

Hanna Pitino

(561) 800-9423 • hapitino@gmail.com • hannapitino.com

Full-stack React and Node.js developer with a strong design sensibility, two production client sites, and a portfolio that spans JWT-authenticated apps, real-time dashboards, and a 3D interactive environment.

EDUCATION

University of Central Florida

B.S. Computer Science | Provost Scholar

Aug 2022 - Aug 2025

Orlando, FL

EXPERIENCE

Full-Stack Developer, Freelance

Apex Mitigation LLC

Feb 2026 - Present

Port Saint Lucie, FL

- Delivered a full-stack marketing site using a PHP/Laravel backend and a custom responsive frontend, taking the project from zero to production with no external UI framework dependencies.
- Integrated a Resend-backed contact pipeline with server-side validation that routes client leads to ownership in seconds, replacing a broken flow that had been losing inquiries entirely.
- Reduced page weight by ~50% through video compression, asset optimization, and template refactoring, achieving sub-2-second mobile load times.

Full-Stack Developer, Freelance

Coastal View Insurance Agency

Nov 2025 - Feb 2026

Palm Beach, FL

- Built and deployed a production site for an insurance agency using React, Node.js, and Express, delivering a fully responsive frontend and RESTful API backend for live client use.
- Cut spam form submissions by 90% with rate limiting, server-side validation, and request hardening on the public-facing contact endpoint.

PROJECTS

Mewcha | Boba Cafe Ordering App

React, TypeScript, Node.js, Express, PostgreSQL

Jun 2026

- Shipped a full-stack ordering platform with a React/TypeScript storefront and separate admin dashboard, implementing JWT authentication with role-based middleware guards to enforce access control across both interfaces.
- Designed a normalized PostgreSQL schema with Knex migrations supporting customization, cart state, and order history, plus a RESTful Node.js/Express API with protected admin routes.

CareCalendar | Caregiving Operations Dashboard

React, Node.js, Express, PostgreSQL

May 2026

- Developed a caregiving operations dashboard including a React frontend and Node.js/PostgreSQL backend, modeling a 3-table relational schema for service tracking, visit status, and multi-day scheduling.
- Engineered real-time analytics including week-over-week trends, daily visit counts, and a live cancellation banner, giving operations staff a one-screen view of agency health.

Roomfolio | 3D Interactive Portfolio

React, Three.js, Blender

Mar 2026

- Created a real-time 3D portfolio environment in React and Three.js from scratch with no starter template, combining custom scene composition and dynamic UI overlays.
- Improved rendering performance by ~40% through baked lighting, geometry simplification, and texture-driven materials, holding 60+ fps on mid-range hardware.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS, SQL, Java, PHP

Frontend: React, Three.js, CSS Modules, Responsive Design, Component-Based Architecture

Backend: Node.js, Express, REST APIs, PostgreSQL, MySQL, Knex

Cloud & Infrastructure: Railway, AWS, Docker, DNS, SSL/TLS

Tools: Git, Jira, Postman, Figma, Blender
