EDUCATION

University of Central Florida

Bachelor of Science in Computer Science

Aug 2022 - Aug 2025

Orlando, FL

EXPERIENCE

Full-Stack Developer (Contract)

Apex Mitigation LLC

Feb 2026 - Present

Port Saint Lucie, FL

- Built and deployed a full-stack marketing website for a water damage restoration company using Laravel (PHP 8.4) and Blade templating, covering multiple pages including service pages, project gallery, pricing, FAQ, and contact.
- Integrated a contact form with transactional email delivery via Resend, routing client lead inquiries directly from the site.
- Implemented a fully responsive mobile layout with custom CSS and optimized site performance through video compression and reduced template overhead.

Full-Stack Developer (Contract)

Coastal View Insurance Agency

Nov 2025 - Feb 2026

Palm Beach, FL

- Built and deployed a production-grade insurance website using HTML/CSS, Node.js and Express, delivering a fully responsive UI and backend API system for real client use.
- Reduced spam submissions by 90% by implementing rate limiting, validation logic, and secure request handling.
- Configured DNS, SSL/TLS, and hosting infrastructure, successfully launching a publicly accessible site with end-to-end HTTPS security.

PROJECTS

Full-Stack Admin Dashboard | React, JavaScript, PostgreSQL

May 2026

- Designed and built a full-stack caregiving operations dashboard from scratch, modeling a PostgreSQL schema across three relational tables with domain-specific fields including service type, visit status, and multi-day scheduling support for 24/7 care arrangements
- Engineered real-time dashboard stats including week-over-week trend tracking, daily visit counts, and cancellation banners with live date context

3D Portfolio Environment | Three.js, React, Blender

Mar 2026

- Engineered an interactive 3D portfolio experience using Three.js and React, combining real-time rendering with dynamic UI interactions to showcase projects in an immersive environment.
- Achieved ~40% improvement in rendering performance by optimizing scene complexity through baked lighting, efficient geometry, and texture-driven rendering techniques.

TECHNICAL SKILLS

Languages: HTML/CSS, JavaScript/TypeScript, Java, SQL, PHP

Frameworks & Libraries: React, ThreeJS, Bootstrap, Express, Laravel

Web & Deployment: DNS configuration, SSL/TLS setup, Railway

Tools & Platforms: Git, Jira, Postman, Docker, AWS, Azure DevOps

Systems & Concepts: Object-Oriented Design, Data Structures, Algorithms, RESTful APIs, Agile Development
